Front-End Developer Task

Time Limit:
3 hours

Aim:
Create a set of simple contact forms using the JSON data provided.

Requirements:

1. Display a title above each form using the JSON 'name' value.
2. Display drop-down select menus with options defined from the JSON 'options' values.
3. Display form inputs (name, email address, message, etc.) after an option has been selected.

Stretch Goals:

1. Add a radio group to each form, populated from the JSON 'contact' values.
2. Style the layout/forms using Bootstrap.
3. Add accordion animations.
4. General front-end 'wow' factor finishing touches.

Example Layout:

Sales or Product Enquiries

Please select ... ⌄

Customer Service Enquiries

Please select ... ⌄

Tip:
The page will need to be accessed via localhost either with a local development environment or a Live Server IDE plugin to prevent a CORS error.
